SUMMARY

Final-year BS Computer Science student at the University of Lahore, graduating in 2027, with previous frontend development internship experience and hands-on experience building **full-stack web applications and Generative AI projects**. Skilled in **JavaScript, React.js, Node.js, Express.js, MongoDB, REST API integration, and Git/GitHub**. Familiar with **LLMs, RAG, LangChain**, and AI-powered application development. Seeking to contribute to MERN stack development and AI-driven software solutions as a Software Development Intern.

TECHNICAL SKILLS

Programming: JavaScript, Python, HTML5, CSS3
Frontend: React.js, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, REST APIs
Database: MongoDB, ChromaDB
Full-Stack: MERN Stack, JWT Authentication, Socket.IO
Generative AI: LLMs, Prompt Engineering, RAG, Embeddings, Vector Search, LangChain, LangGraph, AI Agents
Tools: Git, GitHub, Postman, Streamlit, ChatGPT, Gemini, Mistral AI

PROJECTS

Chatly — Real-Time Chat Application
MERN Stack | Socket.IO | JWT | Railway
Live Demo: chat-frontend.up.railway.app | GitHub: github.com/Muhammad-Waqar022/Chatly-Mern-Project
- Developed a **full-stack real-time chat application** using **React, Node.js, Express, and MongoDB**
- Implemented secure user **authentication with JWT** and **real-time messaging with Socket.IO**
- Added **online-user status** tracking and **deployed** the application on Railway

AI-Powered Code Reviewer
React | Node.js | Express | Generative AI
- Built a React interface for **submitting source code** for automated review
- Developed a **backend review API** in Express using a **route/controller/service structure**
- Integrated **Generative AI** to produce AI-generated review feedback on submitted code

AI-Powered Document Assistant — RAG
Python | LangChain | ChromaDB | Mistral AI
- Built a **retrieval-augmented question answering** application over private PDF documents
- Implemented **document processing, chunking, embeddings, and ChromaDB vector storage**
- Used **similarity search, MMR, and Multi-Query retrieval** to improve response accuracy

Multi-Agent AI Research System
Python | LangChain | LLMs | Tavily | BeautifulSoup | Streamlit
- Built a multi-agent system with **Search, Reader, Writer, and Critic agents** using LangChain
- Automated **web research, information extraction, and report generation**
- Used shared state management and Streamlit for workflow orchestration and results

PROFESSIONAL EXPERIENCE

07/2025 – 09/2025 | Lahore, Pakistan
React Developer Intern
Hapy Co
- Built **responsive web interfaces** using **React.js** and Tailwind CSS
- Developed **reusable frontend components** for web applications
- Worked on **API integration** and dynamic user functionality to improve user experience

06/2025 – 07/2025
Frontend Developer Intern
Code Alpha
- Built **responsive web applications** using **React.js** and Tailwind CSS
- Developed **reusable UI components** for scalable frontend architecture
- Integrated **APIs** for dynamic functionality; improved performance and user experience

EDUCATION

09/2023 – Present | Lahore
The University of Lahore
BS Computer Science (Expected 2027)

2021 – 2023 | Khanewal
Riphah International College
Intermediate in Computer Science (ICS)
